Subj: Implementation of Fleet Modernization Program (FMP) Dashboard Scorecard

Ref (a): FMP Metric Manual

The purpose of this letter is to request all Ship Program Manager (SPM) offices, Ship Planning Yards and other participants of the Fleet Modernization Program (FMP) to provide metric data as defined in Reference (a) to the Executive Steering Committee (ESC) of the FMP. The metrics will populate the FMP Dashboard Scorecard.

The FMP ESC chartered a metric subcommittee to develop a FMP Dashboard Scorecard that measures key business processes and key phases of the FMP. This action was completed in October 2002. The FMP ESC approved the scorecard and related metrics in January 2003. Reference (a) defines the metrics and associated data elements required to populate the FMP Dashboard Scorecard.

The FMP Dashboard Scorecard will reside in the SEA 04 metric database. Data fields will be incorporated in the Navy Data Environment (NDE) for each required metric data element. Activities will update NDE accordingly. The data elements will be electronically downloaded into the required metrics. The FMP Dashboard Scorecard will be updated via these metrics. The metric waterfall in reference (a) displays this process.

The SPM's, Planning Yards and other FMP participants are requested to provide the metric data manually until NDE is updated with the required data fields. The metric subcommittee will work with all parties to develop a standard manual input form.

Any questions relating to the FMP Dashboard Scorecard can be address through the metric subcommittee chair Michael K. Williams, SEA 04, and co-chair Richard Humes, NAVSEA BATH.

Patrick Haney  
Director, FMP
